Hi Madi,

Per our discussion earlier this week, attached is draft FCR-12 for moving station SC-18 approximately 20 ft from the target location and increasing the radius around the target locations. The proposed increase in the radius around the target locations was generally based on the Bayer PDI WP protocols. The two attempts for the 50 ft radius was based on the RM3.5 and RM11E Project Area protocols.

Please let me know if you have any questions. Thanks!
